

Community Meeting Invitation

for the

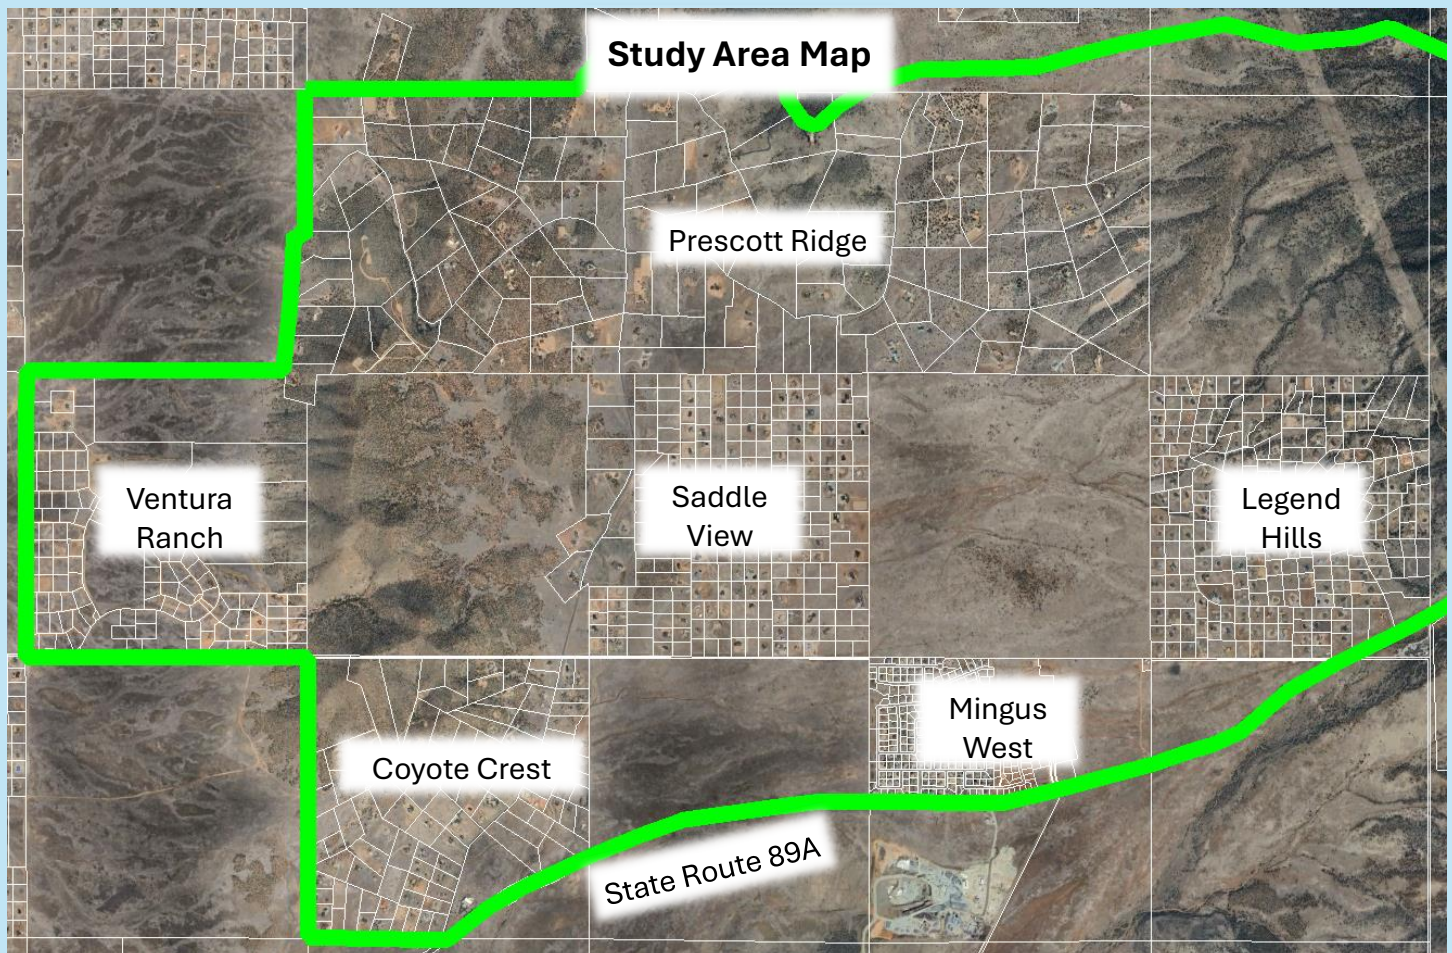

Lonesome Valley

Area Drainage Master Study

The Yavapai County Flood Control District (YCFCD) and their engineer, Lyon Engineering & Surveying (LE), are completing a drainage analysis of the Lonesome Valley area to determine potential flooding and drainage issues as well as possible future improvements. The area includes the subdivisions of Legend Hills, Prescott Ridge, Saddle View, Coyote Crest, and Ventura Ranch.

Have your voice heard! The design team is hosting two community meetings, the first of which will be **Tuesday, May 13, 2025, from 4:30 p.m. to 6:00 p.m. at the Living Waters Church** (8075 N Prescott Ridge Rd., Prescott Valley, AZ 86315). The meeting will give area residents a chance to indicate any known flooding/drainage issues and learn more about the project.

If you have questions or need information prior to the meeting, call or email YCFCD at (928) 771-3197 or web.flood.control@yavapaiaz.gov
